

Regarding the no call list: I believe Indiana has hurt the state's economy, which has already been on the down turn, by their strick no call laws. This proposed federal law would again give Companies the oportunity to contact their past customers when they are having a sale, have a new product that would work in conjection with something they have already purchased, etc. This could help businesses grow, creating new jobs (or at least not having to lay off people from their exising job). Thus keeping the economy going. Indiana's law exempts the insurance and real estate businesses from the no call law because it would hurt their business, when in fact it has hurt all businesses. This bill you are purposing should help the businesses at least in Indiana, which then helps the economy, which in turns helps keep everyone's taxes down. Please vote for this bill. Thank you.
